

# PolarDAM™ Air Dam Foam

## Flexible and Fire-Safe

Air Dam Foam is scored into 1" sections

Easy to store 2'x2'x1' boxes

An easy and flexible way to seal cable cutouts and other floor penetrations at a fraction of the cost of competing solutions.

### Energy Efficient

PolarDAM™ Air Dam Foam is a versatile tool which maximizes cold air containment by keeping cooling air where it belongs.

### Right-Sized

PolarDAM™s' self-forming foam conforms to any area where it is inserted, blocking cold air from escaping into open spaces. The foam sheets are scored into a "tear-to-size" perforated 1" x 1" grid so it can be easily separated along the perforations to make any size or shape needed. PolarDAM™ Air Dam Foam sheets are 24" x 24" x 2" inches tall and each box contains six sheets, or 24 sq. ft. of foam.

### Data Center Safe

The PolarDAM™ Air Dam Foam is fire retardant, meets the UL-94-HF-1 rating, and has stable physical properties so it retains its integrity over time.

# PolarDAM™ Air Dam Skirts

## Easy magnetic or velcro installation

### Energy Efficient

PolarDAM™ air dam skirts maximize air conditioning by keeping cooling air where it belongs. They assure containment of cold air by prevent bypass air around racks, PDUs and other floor mounted equipment.

### Easy to Deploy

The PolarDAM™ air dam skirts are 3.5" x 24" black base boards designed to fit along the front of server racks and block bypass air. They attach easily with either a magnetic or velcro strip. The material is 62 mil thick and can be cut with heavy scissors to make alternative sizes. The skirts come in boxes of ten.

### Data Center Safe

The PolarDAM™ air dam skirts are fire retardant and meet the UL rating of UL-94-V0. The fire retardant polypropylene material is strong, chemical resistant and does not absorb moisture. RoHS compliant.

PolarDAM™ air dam skirts are either magnetic or velcro backed.

PolarDAM™ air dam skirts are delivered in boxes of 10.
